Why Advertise On Us

Advertise On Us is a mobile advertising and promotional marketing company which brings your brand to the forefront of your customer's minds. With the changing ways Americans get their information and make their purchasing decisions, a new and novel way to provide that information has been created for your needs. It was not long ago that information was provided via newspaper, radio, television and word of mouth. Now with the need to provide and receive information faster, there are websites, e-mail and text messages. This is why Advertise On Us is rethinking advertising and promotional marketing for your brand.

Advertise On Us vs. traditional marketing

Advertising or promoting your business with Advertise On Us is a new concept and shows that your company is willing to take the extra step to entice your potential customers. The opportunity to illustrate your message in a unique and unforgettable way allows Advertise On Us to be the company of choice when it comes to method of delivery.

With traditional marketing such as billboards on the side of the road, you only have one chance to get your potential customers interested in your business. Advertise On Us conveys your message on a much more personal basis. Advertise On Us will strategically drive where your customers frequent. Since the advertising campaign is mobile, your customers will read your message over and over again. By seeing the mini-scooter along with the banner, you will know that Advertise On Us is in the business of turning heads and it can be your driving force that delivers your message.

Flexibility of our equipment

Advertise On Us is the industry leader in flexibility literally and figuratively. Each mini-scooter is licensed by the state of Illinois and meets EPA standards while being compact enough to serve your needs. The mini-scooters fold to be smaller than a set of golf clubs which allows Advertise On Us to travel to your customers. Your business reach potential is unlimited because we put your business on our back.

If you want to change your message monthly, weekly or daily, Advertise On Us will accommodate your every need. If you want to use the same message in a later campaign, Advertise On Us will store the banner at no additional cost. A billboard on the side of the road cannot compare to the flexibility provided by Advertise On Us.

Performance Tracking

Advertise On Us offers state of the art performance tracking which will be made available upon your request. With global positioning system tracking on each mini-scooter, you will have piece of mind knowing the exact route your message traveled. We can provide detailed route and stop-duration analysis for your convenience.

Route Analysis

Advertise On Us reviews current department of transportation traffic studies to develop routes to ensure your message reaches the largest possible audience. No matter the angle of the banner, your message can be seen from the front, sides and behind the mini-scooter. This is something that no other mobile advertising company can offer.

Design

Our design experts will assist with the layout of your billboard. Advertise On Us will provide you with a draft of the look and layout of your message and based on your specific direction will make changes prior to the final print of the banner.
